

CONTRACTOR'S GPS NEWSLETTER SPOTLIGHT

Earl Dudley Offers Flexible Options for Every Situation, Every Budget, With the Technical Expertise to Back It Up:

- **iNET reference station network subscription for use with machine control systems**
- **Special Pricing on Topcon Base and Rover Equipment**
- **Machine Control Systems compatible with all brands of base and rovers**

2nd QUARTER 2010

If you're ready to move away from a traditional base and rover GPS system we have the solution. **Earl Dudley's iNet RTK network** and **Topcon's 3D Machine Control systems** keep your machines moving quickly, continuously, and accurately without the need to set up a local base station. With expert on-call technical support and coverage throughout Alabama, Mississippi, Georgia, and Tennessee an iNet subscription and 3D machine control system offer many advantages:

- Increased security- no need to wonder who is watching your base station.
- Increased speed- connect to iNet and be working in minutes, decreasing your set up time.
- Increase productivity- use your crew members where they are needed, not setting up, and/or moving your base station.
- Increased accuracy- survey grade network corrections that you can rely on and field verify.

Call your Earl Dudley representative now for subscription pricing and more information on using iNET and Topcon 3D Machine Control systems.
